Re: Notice of Termination Denial Letter For

**Weaver Poultry Operation**

NPDES Permit # PAG02-0001-11-016

Dear Mr. Weaver:

As required in accordance with 25 Pa. Code § 102.7), the Adams County Conservation District received a Notice of Termination (NOT) form that you hand delivered to the District on **November 26, 2013**.

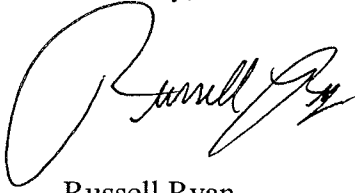

Due to the time of year that final stabilization was conducted, the District is **denying** the NOT until a final inspection can be done to determine if the project meets Chapter in regards to permanent stabilization. The District anticipates a follow-up inspection be conducted in the spring of 2014 to determine if the site meets permanent vegetative stabilization.

The District is aware that the earth disturbance for this project is done and the site has received permanent stabilization. The District also recognizes that the conversion of the two sediment traps to pcsm use was conducted this fall however the vegetation was not fully established as observed during a November 22, 2013 site visit.

When the District determines compliance with Chapter 102.22(a) (2) (i), the Conservation District will provide you with written correspondence stating your compliance and acknowledgement of the NOT will occur at that time.

If you have additional questions, please contact me at 334-0636.

Sincerely,

A handwritten signature in black ink, appearing to read "Russell Ryan". The signature is fluid and cursive, with a large initial "R" and a stylized "Y".

Russell Ryan
